PROFESSIONAL SUMMARY

Third-year Computer Science Engineering student skilled in HTML, CSS, JavaScript, and responsive web design, currently deepening full-stack skills through Angela Yu's Web Development Bootcamp. Built SkillsSphere, a Python/MySQL peer-to-peer platform with an 8-table normalized database, and Talk To Heal, a multilingual voice-based web app using the Web Speech API and Flask. Seeking a Web Development Internship to apply these skills on real-world projects and grow as a developer.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), SQL, HTML5, CSS3, C++

Frontend: React.js, Bootstrap, Responsive Web Design, Flexbox, CSS Grid, DOM Manipulation

Backend: Node.js, Express.js, REST APIs, EJS

Databases: PostgreSQL, MongoDB

Tools: Git, GitHub, NPM, VS Code

Concepts: Full-Stack Development, CRUD Operations, API Integration, Authentication, Version Control

PROJECTS

SkillSphere – Peer-to-Peer Skill Exchange Platform | Python, MySQL [GitHub](#)

- Designed a normalized 8-table MySQL schema with 1:1, 1:M, and M:N relationships, enforced via foreign keys, UNIQUE, and CHECK constraints
- Built a skill-matching engine using stored procedures (e.g. `sp_find_matching_partners`) to pair students by complementary skills
- Implemented transaction-safe session booking and 4 triggers for automated notifications and profile scoring
- Created 3 views and 11 indexes to optimize reporting and query performance

Talk To Heal – AI Voice Healthcare Triage System | HTML, CSS, JavaScript, Python (Flask) [GitHub](#)

- Built a multilingual (8-language) voice-and-text symptom checker using the Web Speech API for speech-to-text and text-to-speech
- Designed a diagnostic engine classifying symptoms across 8 medical departments with 4-level severity triage
- Built the front-end UI and a Flask backend serving diagnosis logic via REST API

MPLADS Sentinel – AI Risk Intelligence System | React/Next.js, Python (FastAPI), PostgreSQL [GitHub](#) (Smart India Hackathon 2026, in progress)

- Designing an explainable AI risk-scoring system for government infrastructure project monitoring using rule-based checks, financial anomaly detection, and NLP-based duplicate-work detection
- Architected a 5-pillar composite risk engine producing an auditable evidence card per flagged case
- Built interactive prototype dashboards and workflow visualizations for the SIH presentation

CERTIFICATIONS & ACHIEVEMENTS

- Complete Web Development Bootcamp – Udemy (Angela Yu)
- C++: Basic Concepts and Programming – LinkedIn Learning
- Qualified for the next round at Smart India Hackathon 2026 (SIH26102) — MPLADS Sentinel
- Participant, Srishti Hackathon — built Talk To Heal, an AI voice healthcare triage system

EDUCATION

Acharya Institute of Technology

Bachelor of Engineering in Computer Science (CGPA: 8.45/10.0)

2024 – 2028

Bengaluru, India
